**What Are the Risks**

Changes in interest rates will affect the value of the Fund's portfolio and its share price and yield. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the Fund adjust to a rise in interest rates, the Fund's share price may decline. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. Investments in developing markets involve heightened risks related to the same factors, in addition to those associated with their relatively small size and lesser liquidity. Investments in emerging market countries are subject to a higher degree of risk. The Fund may be subject to a variety of risks in addition to those described herein. Please consult the Prospectus for a full discussion of these risks.

For each fund with at least a three-year history, Morningstar calculates a risk-adjusted return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive a Morningstar Rating of 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund and rated separately, which may cause slight variations in the distribution percentages.) Morningstar ratings are for Class A shares only; other classes may have different performance characteristics. **Past performance is not an indicator or a guarantee of future performance.**
